PROFESSIONAL OBJECTIVE

To secure a front-end or full-stack development role—internship or freelance where I can apply my skills in React, Next.js, and JavaScript, contribute to impactful digital experiences, and grow alongside a forward-thinking team while exploring areas like AI and mobile development.

Work Experience

Freelance Front-End Developer Jan 2023 – Present

- Built responsive, high-performance websites using React, Next.js, and Tailwind CSS for personal and small business projects.
- Collaborated on GitHub, implemented version control, and deployed projects using Vercel.

Algerian E-Traveling Platform Feb 2024 – May 2024

Higher School of Computer Science & Digital Technologies, Bejaia

In my second year, I helped build *Wonderlust*, a modern website promoting tourism in Algeria. The project includes source code, docs, and platform features. I also joined school clubs to grow my teamwork and tech skills.

Projects

Athar Baqi – Quranic Recitations and Education

[WEBSITE](#) | [CODE](#)

Tech Stack: Next.js, TypeScript, CSS Modules, Font Awesome, Google Fonts
A modern Islamic educational platform offering high-quality Quranic recitations, Tajweed lessons, and Islamic articles.

[WEBSITE](#) | [CODE](#)

LandCo – Business Platform

Tech Stack: Next.js, Tailwind CSS, Prisma, PostgreSQL, Authentication
A comprehensive business management platform with user subscriptions, support system, and customer dashboard.
